

SOIL TEST – SUMMARY & RECOMMENDATIONS

Alice Jones - Front Yard/Bad Spot - July 10, 2021

EW4H RECOMMENDS

Recommended Products

All types of soil will benefit from the [EW4H Lawn Program](#) to balance the elements in the soil:

- [EW4H Replenish For Your Lawn](#)
- [EW4H Liquid Fertilizer For Your Lawn](#)

Your soil test indicates that you would benefit from these additional products:

- [EW4H Replenish For Your Gardens](#)
- [EW4H Liquid Fertilizer For Your Gardens](#)
- [EW4H Liquid MagFusion](#)
- Gypsum

For Best Results Follow The Steps Outlined Below.

Soil Compaction [Learn More »](#)

Magnesium is low. Use [EW4H MagFusion](#) twice this season in between the [EW4H Liquid fertilizer](#) applications.

Potassium is low. Use of the [EW4H Liquid Fertilizer For Your Lawn](#) 2-3 times from May through October are highly recommended.

Contaminants [Learn More »](#)

Sodium is high. Apply 10 lbs per 1000 sq. ft. of gypsum 1 time(s) per season. Separate applications by at least three months. Apply the [EW4H Liquid Fertilizer For Your Gardens](#) in the summer, in addition to consistent applications of the [EW4H Lawn Program](#), to help buffer the sodium away from the plant roots.

Recovery [Learn More »](#)

Phosphorus is low. It is very important to make two applications (spring and fall) of the [EW4H Replenish For Your Lawn](#) organic based fertilizer. In addition, make a summer application of the [EW4H Replenish For Your Gardens](#) organic fertilizer.

Bioavailability [Learn More »](#)

EW4H Replenish and Liquid fertilizer are carbon focused products that will help maintain **organic matter** percentage. There is no good or bad **holding capacity**, but it helps us when making soil recommendations Our recommendations consider your specific soil **pH** and we have adjusted accordingly.
